

## NEW MACHINES

**..as a complete new machine Often the market of second-hand machines does not offer the suitable machine that is urgently needed in order to handle the suitable width of the goods.**

Our specialized knowledge and our modern machinery offer the possibility to build **complete VH Jigger** in **any roller width**.

That means, each individual part like tub, hood, side shields, rollers, banana roll, roof and circulating pump will be **re-produced**.

The established, durable construction of Vald Henriksen Denmark combined with the newest technology of Otto-Pricken result in a reliable precision dyeing Jigger.

**Jigger with roller width 3600mm**
