

VARIOUS ROLLER

Our modern machinery enables the production or the repair of various rollers from the textile industry. Rollers like spreader rolls, various deflecting rollers, sensing rollers, carrier rollers, S-Rollers or also calendar-rolls are produced or reconditioned.

All processing steps such as burnish, polish, turning, to chrome and to remove chrome, to rubberize or teflon coating are completed by specialists.

Each individual roller will be examined in every detail for tire balance, strengthening and tightness before it is dispatched.
